OBJECTIVE

B.Tech Computer Science & Engineering student (2023–2027) with practical experience in developing responsive and scalable web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and Django. Seeking a Full Stack or Frontend Developer Internship where I can apply my technical skills, contribute to real-world software development, and continue learning in a professional engineering environment.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript (ES6+), SQL	Frontend Development: HTML5, CSS3, React.js
Backend Frameworks: Node.js, Express.js, Django (Python)	Databases & Cloud: MongoDB, MySQL, SQLite3, AWS Cloud Essentials
Developer Tools: GitHub, VS Code, Postman API Testing	Core Computer Science: DSA, DBMS, OOP, OS, CN

EDUCATION

Bachelor of Technology – Computer Science & Engineering <i>Babu Banarasi Das Northern India Institute of Technology, Lucknow</i>	2023 – 2027
Intermediate (Class XII) – UP Board <i>Indar Prasad Chaudhary Janjaatiy Smarak Intermediate College, Uttar Pradesh</i>	2021
High School (Class X) – UP Board <i>Baba Kamla Prasad Smarak Intermediate College, Uttar Pradesh</i>	2018

TECHNICAL PROJECTS

Hospital Management System (GitHub)	MERN Stack
- Engineered a full-stack Hospital Management System using Node.js, Express.js, and MongoDB to streamline patient registrations, doctor scheduling, and administrative workflows. - Implemented secure, role-based access control (RBAC) layers custom-tailored for Admins, Doctors, and Reception staff to protect patient data integrity. - Designed and optimized RESTful API endpoints for dynamic appointment scheduling and state preservation.	
Movie Recommendation System (MovieMatrix) (GitHub)	Frontend & API Integration
- Developed a highly responsive web application integrating the real-time third-party OMDb API to fetch deep cinematic records. - Implemented a customized client-side Debounce technique to optimize input-search event handlers, successfully reducing redundant network calls by 40%. - Crafted smooth asynchronous UI transitions using native JavaScript and advanced DOM manipulation to present movie details and user ratings cleanly.	
Secure Video Authenticator (GitHub)	Python & Django
- Architected a secure digital video asset manager utilizing Python and the Django framework with an integrated SQLite3 database. - Deployed robust built-in authentication controls, cryptographic password hashing, and restricted access guards for unauthorized video directory views. - Built an end-to-end file upload validation mechanism protecting server-side environments against unverified media extensions.	

CERTIFICATIONS

JPMorgan Chase – Software Engineering Job Simulation 	September 2025
AWS – Solutions Architecture Job Simulation 	September 2025
AWS – Cloud Practitioner Essentials 	September 2025
AWS – Fundamentals of Machine Learning & AI 	September 2025
Deloitte Australia – Data Analytics Job Simulation 	September 2025
Tata Group – GenAI Powered Data Analytics Job Simulation 	October 2025

ACHIEVEMENTS

- Problem Solving:** Solved 150+ coding problems on LeetCode and other coding platforms.
- Git & GitHub:** Maintained multiple web development projects using Git and GitHub.
- Industry Learning:** Completed 6+ job simulations and certifications in Software Engineering, Cloud, and Data Analytics.
