OBJECTIVE

Computer Science undergraduate (B.Tech, 2023–2027) with proven experience building and deploying full-stack applications — including an AI-powered assistant using Google Gemini and a role-based hospital management system — with React.js, Node.js, Express.js, MongoDB, and Django. Skilled in JWT authentication, REST APIs, and cloud deployment (Vercel, Render, AWS). Seeking a Full Stack Developer Internship to apply and expand these skills in a professional engineering team.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript (ES6+), SQL	Frontend Development: HTML5, CSS3, React.js
Backend Frameworks: Node.js, Express.js, Django (Python)	Databases & Cloud: MongoDB, MySQL, SQLite3, AWS
Developer Tools: GitHub, VS Code, Postman API Testing	Core Computer Science: DSA, DBMS, OOP, OS, CN

EDUCATION

Bachelor of Technology – Computer Science & Engineering <i>Babu Banarasi Das Northern India Institute of Technology, Lucknow</i>	2023 – 2027
Intermediate (Class XII) – UP Board <i>Indar Prasad Chaudhary Janjaatiy Smarak Intermediate College, Uttar Pradesh</i>	2021
High School (Class X) – UP Board <i>Baba Kamla Prasad Smarak Intermediate College, Uttar Pradesh</i>	2018

TECHNICAL PROJECTS

DevMate AI (GitHub Live Demo)	Full Stack AI Web Application (MERN + Google Gemini AI)
- Designed a production-ready AI-powered assistant using Node.js, Express.js, MongoDB Atlas, JWT Authentication, and Google Gemini AI, enabling intelligent conversations, document analysis, image understanding, and coding assistance. - Implemented advanced AI capabilities including conversation memory, ChatGPT-style file uploads, image analysis, code explanation, bug detection, code optimization, README generation, code review, and document summarization, providing an interactive multi-purpose AI experience. - Built a secure authentication system with Email OTP verification, password reset, chat history management, shareable conversations, export chats, responsive UI, and cloud deployment on Vercel, delivering a scalable full-stack application.	
Enterprise Hospital Management System (GitHub Live Demo)	Full Stack (MERN + Gemini AI)
- Engineered a production-ready MERN stack hospital management platform using React.js, Node.js, Express.js, MongoDB Atlas, JWT Authentication, and Google Gemini AI, streamlining clinical operations and patient care services. - Built 4 Role-Based Access Control (RBAC) portals (Admin, Doctor, Receptionist, Patient) featuring Razorpay Payment Gateway integration, security audit logs, rate limiting, and automated PDFKit GST invoice & Rx prescription downloads. - Integrated Google Gemini AI to deliver intelligent symptom assessment and real-time healthcare conversations, alongside Gmail OTP authentication, secure password recovery, and cloud deployment on Vercel & Render.	
Secure Video Authenticator (GitHub)	Python & Django
- Architected a secure digital video asset manager utilizing Python and the Django framework with an integrated SQLite3 database. - Deployed robust built-in authentication controls, cryptographic password hashing, and restricted access guards for unauthorized video directory views. - Built an end-to-end file upload validation mechanism protecting server-side environments against unverified media extensions.	

CERTIFICATIONS

JPMorgan Chase – Software Engineering Job Simulation	September 2025
AWS – Cloud Practitioner Essentials	September 2025
AWS – Fundamentals of Machine Learning & AI	September 2025
Deloitte Australia – Data Analytics Job Simulation	September 2025
Tata Group – GenAI Powered Data Analytics Job Simulation	October 2025

ACHIEVEMENTS

- Problem Solving:** Solved 150+ coding problems on LeetCode and other coding platforms.
- Git & GitHub:** Maintained multiple full-stack projects using Git and GitHub.
- Industry Learning:** Completed 6+ job simulations and certifications in Software Engineering, Cloud, and Data Analytics.
